

Save Manipur Save India From Narco-Terrorism

A big threat looms over India. What threat? The threat of a drug pandemic spreading across every nook and corner and affecting everyone in one way or the other. What is drug pandemic? It is a pandemic of widespread drug abuse or addiction destroying the lives, health, wealth, morale, and social values of the Indian people. But why it happens? This threat is the fallout of letting South-East Asia's drug "Golden Triangle" extended into Manipur (Northeast India) by keeping open the floodgate of cross-border infiltration and contraband drugs. Some of the illicit drugs smuggled from Myanmar into other states of India via Manipur are *Amphetamine*, *Brown Sugar*, *Crystal Methamphetamine* ('ice', ice drug), *Heroin powder*, *Methaqualone*, *World is Yours* (*Methamphetamine*), etc. In other words, illicit trade in drugs flourishes and widespread abuse of the banned narcotic drugs and psychotropic substances is on a geometrical rise. For their profit they spread drug pandemic. Therefore, a big threat for India.

Who are responsible for the threat? Government of India remains lagging far behind in providing complete protection of the Manipur sector of the Indo-Myanmar boundary from cross-border narco-traders and contraband drugs. Taking advantage of this lagging/ weakness narco-business has been carried out extensively by a collusion of market forces in which cross-border narco-terrorists plays the most dominating and aggressive role. Heavily armed narco-terrorist organisations, who are (*allegedly protected by Government of India*

[Narco-terrorists attacking civilians on May 3, 2023]

under an agreement known as the *Suspension of Operation since 2008*) also indulge in widespread poppy plantation for extraction and export of opium and opiates. Earlier semi-raw opium was compressed and exported to Myanmar and other India's states. Nowadays, opium concentrating and processing are carried out in clandestine kitchen laboratories in plantation hills and elsewhere.

The cross-border narco-terrorists powerfully operate among Kuki-Chin populations. They are carrying out offensive activities to carve out an exclusive territory to be used for absolute monopoly of their illicit trade and plunder of the eco-system. The money raised from narco-trade funds their militia, weapons, ammunition, politicians, NGOs and bureaucrats. With all these at play, they secretly transplant illegal infiltrators into Manipur to increase their number. The infiltrators took over the opportunities hitherto reserved for

Seizure & Arrest Under ND&PS Act in Manipur from 01/03/2017 to 02/05/2023

Particulars of drug seized	No. cases Regd.	No. of persons arrested	Quantity of drugs
	01/03/2017 to 02/05/2023	01/03/2017 to 02/05/2023	01/03/2017 to 02/05/2023
No. 4 (Heroin) Powder	711	977	270.4 kgs.

the indigenous Scheduled Tribe members. They expand land grabbing and territorial occupation, exploit resources, and destroy forests and create ecological imbalance. It creates demographic imbalance among co-existing communities and insecurities. Overall, narco-terrorists are responsible for; (a) external aggression on India's territory both by contraband drugs and infiltrators, (b) attack on the rights and securities of the pre-existing indigenous citizens, and ethnic cleansing of vulnerable sections. All these pose serious threat to India's security, tranquillity, and law and order.

Eventually, the peace loving people of Manipur are exposed to the combined onslaught of drug pandemic and ethnic cleansing by the collusion of cross-border narco-terrorists and the chauvinists Kuki-Chin reactions largely comprising of illegal infiltrators. The peace loving people of Manipur are standing with firmed determination to defeat these forces to save ourselves and the

country from complete devastation by drug pandemic and external aggression.

It is high time that the people of India joins hand to Save Manipur: Save India from narco-terrorism.
